

MT-168A

DIGITAL ATTENUATOR

Programmable Digital
Attenuator
200 to 8000 MHz

OVERVIEW

The MT-168A programmable digital attenuator is a completely shielded, high performance, digitally controlled, 16-channel RF attenuator system. It is intended for any automated RF testing where high accuracy signal power control is needed. The MT-168A offers very good attenuation accuracy, high dynamic range and speed. The high performance of the attenuator is obtained through a high precision attenuator design and calibration.
